2018 - 2020

BSc Degree Information Technology & Computer Science

Accumulated 7 distinctions over the course of the degree.

If you would like to see more details about this education period, please have a look at my website in the education section.

WORK EXPERIENCE

Matogen Corporate Web Development - Internship

2019/12-2020/01

Responsibilities: Development of a mobile application from scratch.

During these four weeks my knowledge about the software development industry grew substantially. I learned valuable lessons in PHP scripting as well as Android/iOS development. I was tasked with developing a mobile application that would allow the user to store text files, video files, audio files and images in a local database. Clockify was the software used to keep track of my working hours and make it easier for my mentor to see what I was currently busy with.
